The screenshot shows a search results page from a library database. At the top, there is a search bar with the term 'homelessness' entered. Below the search bar, the results are displayed in a list format, sorted by relevance. The first result is 'Vulnerability to Homelessness, Use of Services and Homelessness Prevention in Black and Minority Ethnic Communities' by Netto, Gina, published in Housing Studies, July 2006. Other results include articles on homelessness in social exclusion, rough sleeping in Scotland, and the prevalence of homelessness in the United States. On the left side, there is a 'Subject: Thesaurus Term' section with a list of related terms: HOMELESSNESS, SOCIAL policy, HOMELESS persons, SOCIAL problems, COMMUNITIES, and QUANTITATIVE research. The 'All Results: 1-10 of 2749' and 'Sort by: Relevance' are also shown.

Our results are listed by Relevance in the center of the page. This initial search returned nearly 3,000 hits. To focus our search, we can use suggested Subject Terms - applied terms to describe the article's contents. We'll click on Social Problems to add it to our search. Slide 7

The screenshot shows the EBSCOhost search interface. At the top, the search term 'homelessness' is entered. The results are sorted by Relevance, showing 1-10 of 38 results. The first six results are listed, each with a title, author, journal information, and options to view the full text or add to a folder. The interface includes navigation tabs like 'Basic Search', 'Advanced Search', and 'Visual Search'. On the right, there are options to 'Limit your results' and 'Update Results'.

This is a close-up of the second search result. The title is 'Global Female Homelessness: A Multi-Faceted Problem'. The author is 'Skrich, Keri Weber'. The journal is 'Gender Issues', Vol. 25 Issue 3, p147-156, 10p; DOI: 10.1007/s12147-008-9062-8; (AN 34694695). There are links for 'PDF Full Text (139KB)', 'Add to folder', and 'Relevancy: [progress bar]'. A small box on the left indicates 'All Results: 1-10 of 38'.

- Abstract:** International female homelessness is a difficult subject to address for a number of reasons. First, understanding what defines homelessness poses a problem because female homelessness often takes on a different form than that of male homelessness. Also, homelessness in industrialized countries looks different from that of developing nations where women are more likely to have inadequate housing in temporary shelters or live as squatters. Both of these factors affect the visibility of female homelessness as well as the ability to garner an accurate account of the number of homeless women around the world. Understanding the causes of female homelessness from a global perspective is no less difficult to comprehend because it encompasses so many other multifaceted issues. Women in developing nations face a different set of issues than their counterparts in the industrialized world because of differences in property rights, women's rights, generally, access to education, and access to social services. Finally, immigrant women face a unique set of circumstances of being a foreigner without an adequate social support network. [ABSTRACT FROM AUTHOR]
